Adaptive Study Planner Based on Learning Patterns

Overview

Adaptive Study Planner is a student-focused productivity app that creates personalized study recommendations based on learning patterns, attention span, mistakes, revision habits, and emotional state. The goal is to help students study smarter, stay motivated, and build consistent learning habits.

Problem Statement

Many students struggle with:

Procrastination

Poor time management

Lack of motivation

Irregular revision schedules

Difficulty maintaining focus

Our solution uses adaptive learning techniques and gamification to make studying more effective and engaging.

Features

Personalized Profiles

Create and manage multiple user profiles

Choose a boy or girl character avatar

Customize characters using earned rewards

Today's Pulse

Track daily emotions and energy levels

Select moods such as Calm, Motivated, Stressed, or Exhausted

Helps the system understand learning behavior and recommend suitable study plans

Today's Aim

Set daily study goals

Stay organized and focused on priorities

Task Manager

Add, manage, and complete study tasks

Track daily progress efficiently

 Adaptive Pomodoro Timer

Dynamically adjusts study and break durations

Adapts to user attention span and performance

Encourages better focus and productivity

 Review Habits Tracking

Log revision activities such as:

Reading pages

Flashcards

Practice questions

Note revision

Generates personalized study recommendations

Friends & Study Groups

Add friends

Study together

Motivate and track progress collaboratively

Beans Reward System

Earn Beans by completing tasks and study sessions

Use Beans to unlock character customizations and rewards

Analytics & History

View study insights and performance trends

Analyze strengths and improvement areas

Track progress over time

Customizable Study Environments

Choose your preferred study background:

 Library

 Coffee Shop

 Japanese Café

How It Works

The system analyzes:

Attention span

Task completion rate

Mistake frequency

Revision consistency

Mood patterns

Based on this data, it generates adaptive study recommendations that help students improve productivity and learning outcomes.

Tech Stack

Frontend: Flutter / React Native (Customizable)

Backend: Node.js / Firebase

Database: Firebase Firestore / MongoDB

Authentication: Firebase Authentication

Analytics: Custom Learning Pattern Engine

Future Enhancements

AI-powered study recommendations

Smart exam preparation planner

Voice assistant integration

Focus detection using device sensors

Advanced learning analytics

Leaderboards and study challenges

Team Vision

Built by students, for students.

Our mission is to transform studying from a stressful task into an engaging, personalized, and rewarding experience through adaptive technology and gamification.

Study Smarter. Stay Consistent. Grow Every Day. 📖 ✨
